Experience

Seak — Fullstack Engineer

March 2024 - July 2024

React Native Django Google Cloud Platform Cron Jobs Postgres SQL

Seak is a platform that connects global retailers with Southeast Asian artisans. Seak's mission is to support and empower small businesses in Southeast Asia by providing them with the tools and opportunities to grow on a global stage.

- Built and maintained Seak's Supplier Mobile App from scratch using React Native and React ecosystem
- Worked directly with the CEO, supplier team and UI/UX to define features and incorporate user feedback from beta test users.
- Developed Django server app to serve REST APIs for the mobile app and Cron jobs for notifications and automatic product publishing
- Led the process for launching the app on the Google Play Store and App Store

Figify

Preact Vite Figma API Open Source

A minimal Figma plugin starter template using Preact and TailwindCSS bundled with Vite. This allows type-safe actions to communicate with Figma window and an easier and faster way to develop figma plugins.

github.com/zeyarpaing/figify

Burmese Content

Preact Vite Figma API Open Source

A figma plugin for filling sample content for Burmese UI/UX designers. This helps saved a lot of time for designers who have to fill their interfaces with sample data. The plugin allows filling data with 1 click saving time for searching and copy-pasting data.
